

EXCEEDING
EXPECTATIONS.

Value-driven IT Solution Delivery

This guide covers the essential stages of creating a successful software solution and the added-value Accedia provides to its clients throughout the project development in its role of a technology partner.

Your journey starts here

Solution Idea Evaluation

The client approaches Accedia with a challenge that needs to be addressed or idea for a new software solution.

Cross-functional team engagement

Business Analyst, Account Manager and a Technology Lead are all involved to help client outline business priorities and ensure the solution idea fits into the company's strategic plans.

Transparent Team Selection Process

Clients participate in discussions with potential candidates on all project roles, ensuring the most suitable Consultants for the project.

Tailored Solution Proposal

Accedia creates a Detail Project Estimation using bottom-up approach to make technical estimates, assumptions and evaluate risks.

Technical Feasibility Assessment

Bringing in an independent Accedia Consultant to identify which technologies have the greatest likelihood of achieving project success and scalability.

On-site kickstart

Working closely with the client's team during the first phase of the project. Flexibility in work locations and exchange of visits.

Project Rollout

Both sides participate in setting up communication channels, introduction of stakeholders, as well as defining a process for monitoring results and obtaining feedback.

Project Manager on-the-house

Nevertheless small or large project, Accedia assigns a non-billable PM with solid tech background as a direct point of contact.

Team Scalability

Ability to scale the talent capacity up and down, according to business demand.

Solution implementation

Taking the created plan into action and producing the deliverables by applying the Agile methodology.

Internal Quality Management

Dedicated Process & Quality team ensures all processes within the company - from initiation to service delivery are being monitored and continuously improved.

Strategic Innovation Advisor

Business Analyst, Account Manager and a Technology Lead are all involved to help client outline business priorities and ensure the solution idea fits into the company's strategic plans.

Solution delivery

Accedia hands over the solution to the client, according to defined SLAs, and provides onboarding and training.

Development Roadmap

Accedia helps client map a road for future solution development and recommendations for improvements based on long-term business goals.
